

An Eclipse Plugin for Validating Names in UML Conceptual Schemas

Choosing **good names** is **complicated**

We provide **assistance** to **conceptual modelers**

The screenshot shows the Eclipse IDE interface with the 'Check Names' menu option highlighted. Below the menu, the 'Verbalize View' displays a list of errors:

Name	Error	Id
Sales	The head is not in a singular form.	1
identifiedByItsName	The constraint name is not a third-person singular number verb.	4
perishable	The boolean property name has not a third-person singular number verb.	2
Money	The class name head is not a countable noun.	1
